

# Case Study

## Aberdeen Sports Village

Envirobin at the Aberdeen Sports Village.

A partnership between the University of Aberdeen, Aberdeen City Council and sportscotland, Aberdeen Sports Village is the premier sport and exercise facility in Scotland and provides world class opportunities for everyone in the community. It is open to students, staff and the public with facilities for athletics, football, swimming, hockey, squash, martial arts and boxing.

“We had a £50million sports facility that was in need of a waste solution for customers,” said Danny Costello, Operations Manager at the Sports Village. “We were keen on being able to recycle as much of the waste as possible.”

Having located Leafield Environmental via the internet, Leafield Sales Manager Christine McIntyre reviewed the requirements and presented a sample bin, suggesting that they could be produced in corporate colours. A combination of Meridian and Maxi Envirobins met all the requirements.

“The bins look great in our corporate colours and we have increased our recycling output,” continued Danny.

“The Leafield bins are fantastic quality and stand up well to the rigors of our busy sports facility. Leafield have a huge range of space-saving recycling solutions to choose from and a great colour palette to match.”
