

Installation guidelines

Leaffield litter bins

Envirobank 140

Cleaning Products should be flushed with clean water and then washed with a mild detergent solution using a bristle brush or sponge. Care should be taken not to apply undue pressure that may damage labels. Flush clean with water after washing.

Quality Standards All Leaffield Environmental products are certificated to BS EN ISO

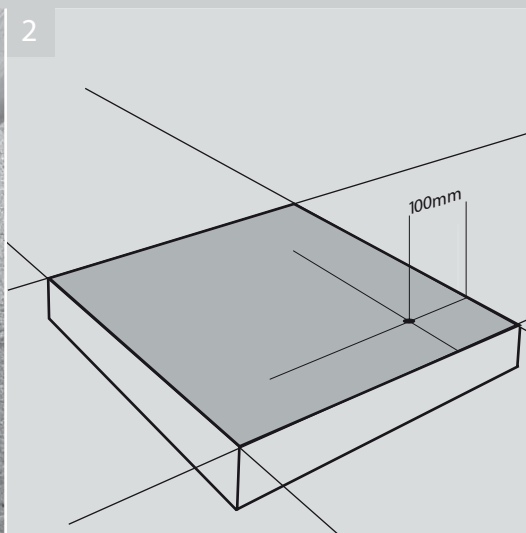

Tools Chalk, Hammer drill, 12mm masonry drill bit, Mallet, 17mm spanner

PPE Always wear appropriate PPE equipment and follow safety guidelines.

Marking out holes

Position the body in the required location and orientation, mark through the holes in the base to the ground below

Check - if fixing to pavement check that the hole positions are not too close to the edge of the paving slab (min 100mm from edge if possible)

Remove the body to expose the ground below, clearly mark the positions of the four holes with a cross

Ground fixing kit
additional components:
Available as optional
extra

Ground fixing bolts

Washer

X4

X4

Ground fixing to asphalt is not recommended

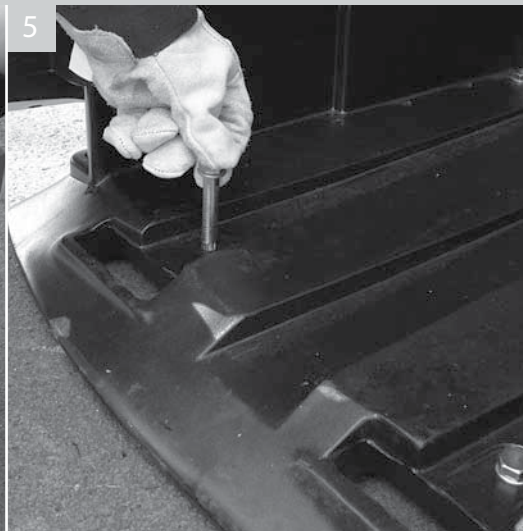

Drilling holes and inserting bolts

4

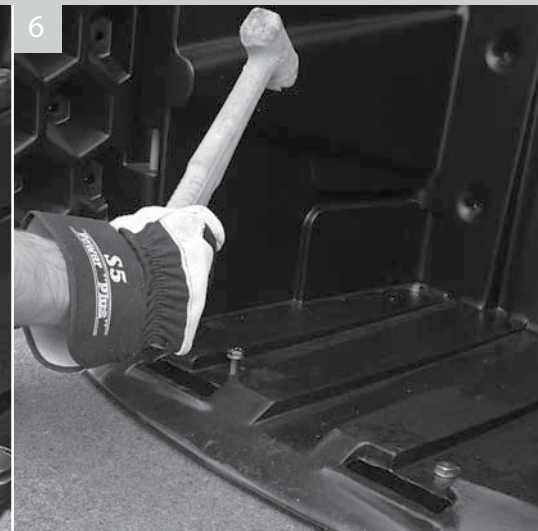

Drill 12mm holes at the four marked positions to a depth of 115mm to accommodate the ground fixing bolts

5

Add washer. Push bolts through holes in bin locating into drilled ground holes

6

Use a mallet to drive the four bolts into the holes drilled in the ground through the moulded holes in the bin base

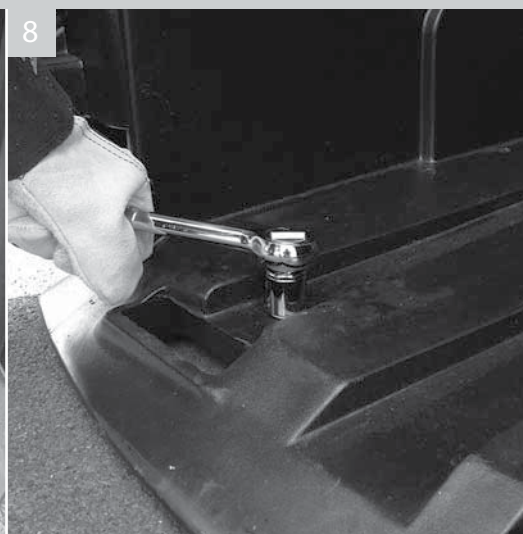

Tightening bolts

7

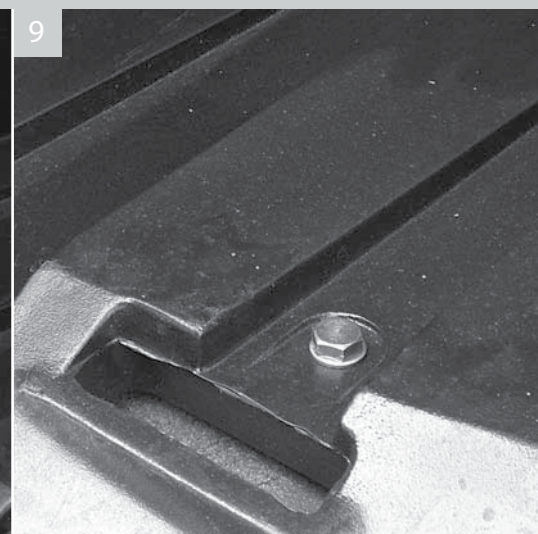

Drive the bolts in through the moulded holes until the tops sit flat on the bin base with the washer between bolt head and bin

8

Use a spanner or socket to tighten the bolts

9

Tighten the bolts to 22.0Nm torque for concrete. Tightening the bolts will fan out the bolt sheath in the hole holding the bolt secure

10

Once all bolts are tightened and secure close door
