

# Installation guide

## TwinBin

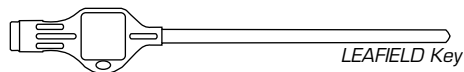

**Cleaning** Products should be rinsed with clean water and then washed with a mild detergent solution using a bristle brush or sponge. Care should be taken not to apply undue pressure that may damage labels. Flush clean with water after washing.

**Quality Standards** All Leaffield Environmental products are certificated to BS EN ISO

**Tools** Chalk, Hammer drill, 15mm masonry

**PPE** Always wear appropriate PPE equipment and follow safety guidelines.

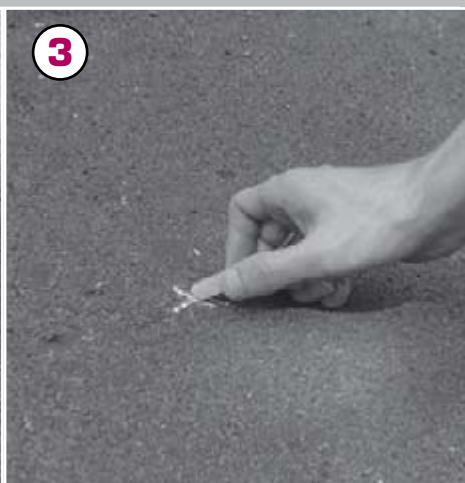

## Marking out holes

1 Position the body in the required location and orientation, mark through the holes in the base to the ground below

2 Using chalk mark the position through the four holes in the bin base onto the ground below.

3 Move the bin to one side and clearly mark the ground in the four hole positions with a cross.

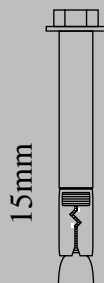

### Please Note:

Gravel should be supplied by contractor.

Ground fixing to asphalt is not recommended.

Ground fixing kit and ballasting additional components:

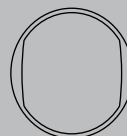

Ground fixing bolts

Washer

Ballast bung

## Drilling holes and inserting bolts

1 Drill 15 mm holes in the four marked positions to a depth of 110mm to accommodate the bolt length. Remove debris from the holes.

2 Re-position the bin over the drilled holes. Add washers to bolts and push through moulded holes locating into drilled ground holes beneath.

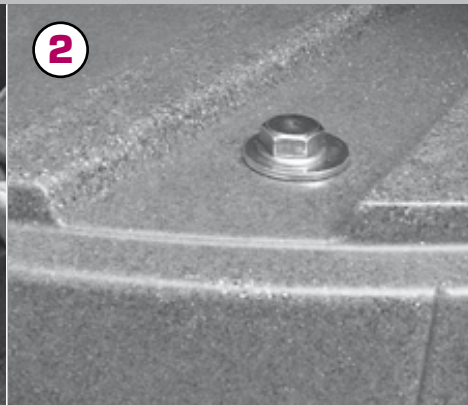

3 Using a mallet drive the bolts home.

## Tightening bolts

1 Use a spanner or socket to tighten the bolts.

2 Tighten the bolts to 22.0Nm torque for concrete. Tighten the bolts will fan out the bolt sheath in the hole holding the bolt secure.

3 Replace liner and shut the door.

## Ballast filling

1 Remove bottom cap and pour gravel into hole.

2 Clear the hole of gravel so that the gravel level is 30mm from the top of the surface to accommodate the ballast cap.
